

CCO Networking Seminar

Date: Wednesday, 04.03.20 at 12:15 p.m.

Location: CCO Auditorium

Chair: Melissa Herman

Speaker:

Martha Sommer

Dynamic versatility of arrestin-GPCR interactions

„Arrestin proteins are the chief regulators of the large and pharmaceutically important family of G protein-coupled receptors. How do arrestins achieve versatility in receptor binding while supporting their multitude of cellular functions? This seminar will describe my journey so far in answering this fundamental question.“
