

NEUROIMMUNOLOGICAL COLLOQUIUM

Summer Semester 2024

29th April **Prof. Shohreh Issazadeh-Navikas**

Faculty of Health and Medical Sciences, Copenhagen, Denmark

FoxA1+T regulatory cells: players in Multiple Sclerosis and NMOSD?

13th May **Young Investigator Session - Dr. Sebastian Torke**

Translational oncology of solid tumours, MDC Berlin

BTK inhibitors in Multiple Sclerosis: a novel avenue for targeting active as well as progressive disease?

27th May **Dr. Pablo Villoslada**

Hospital del Mar - Parc de salut MAR, Barcelona, Spain

Computational biology and artificial intelligence approaches to MS, from genes to the clinical phenotype

10th Jun **Dr. Catharina Gross**

Clinic for Neurology with Institute for Translational Neurology, Münster, Germany

Identification of multiple sclerosis endophenotypes by high dimensional blood signatures associated with distinct disease trajectories

24th Jun **Young Investigator Session - PhD student Alba Del Río Serrato**

Innate immunity and Neuroinflammation, ECRC Berlin

Innate lymphoid cell functionality within the CNS: implications in MS and NMOSD

8th Jul **Prof. Carsten Carlberg**

Institute of Biomedicine, University of Eastern Finland, Finland

Impact of the vitamin D response index for Multiple Sclerosis

17:00 - 18:30h at Hörsaal Pathologie, Virchowweg 14, CCM

Chair:	NIC organization committee:	Sponsors: TBA
Prof. Dr. med. Friedemann Paul <i>friedemann.paul@charite.de</i>	Andre Braginets <i>andre.braginets@charite.de</i>	
Prof. Dr. Carmen Infante Duarte <i>carmen.infante@charite.de</i>	Sara Cestari <i>sara.cestari@charite.de</i>
