

## CALL FOR APPLICATIONS - InViTE International Visiting, Training & Exchange Program

**The InViTE Program** aims to contribute to global neuroscience exchange and collaboration by fostering scientific interactions with early career researchers (PhD, MD) from Africa, Latin America, and Southeast Asia.

### Focus:

- ▶ Network building
- ▶ Bidirectional knowledge exchange
- ▶ Training in state-of-the-art methods

### Formats:

- ▶ Networking visits to Berlin neuroscience community, with option to extend to:
- ▶ One-year internships in NeuroCure labs, with option to extend to:
- ▶ Two-year postdoc positions in NeuroCure labs

### What we offer:

- ▶ Collaborative research environment: Work with leading basic and clinical neuroscientists
- ▶ Full salary positions including social security benefits
- ▶ Professional development: Access to workshops, seminars, and networking

### Our mission:

The Cluster of Excellence NeuroCure is a collaborative, interdisciplinary, and translational research network in the neurosciences that aims to better understand disease mechanisms and develop new therapies for neurological and psychiatric disorders. The Cluster is embedded in a vibrant neuroscience community with research foci ranging from cellular and molecular neurosciences to systems and computational approaches.

For more information, visit [www.neurocure.de](http://www.neurocure.de)

**Application deadline: April 9, 2026**
