

## CALL FOR APPLICATIONS POSTDOC PROGRAM IN THE NEUROSCIENCES

### NeuroCure Talents Program

NeuroCure Talents is a new structured program that welcomes outstanding postdoctoral researchers from around the globe. It offers an opportunity to establish an independent research project within the Cluster of Excellence NeuroCure that advances basic, clinical, or translational neuroscience.

#### What we offer:

- ▶ Collaborative research environment: Work with leading basic and clinical neuroscientists
- ▶ Three-year contract: Full salary position including social security benefits
- ▶ Personal budget for travel, conferences, and training
- ▶ Structured mentoring: Guidance from experienced NeuroCure principal investigators
- ▶ Professional development: Access to workshops, seminars, and networking opportunities
- ▶ Family-friendly and inclusive research culture

#### Our mission:

The Cluster of Excellence NeuroCure is a collaborative, interdisciplinary, and translational research network in the neurosciences that aims to better understand disease mechanisms and develop new therapies for neurological and psychiatric disorders. The Cluster is embedded in a vibrant neuroscience community with research foci ranging from cellular and molecular neurosciences to systems and computational approaches.
